

Progression Summary

Fill out one form per feature (not activity). In the Visual Progress pane, try and outline any progress you will have made to features that affect the visual display of the app - UI Views, Navigation Controls, etc. Don't show the entire screen (unless applicable), concentrate on the feature.

Activity	AvatarPage	
Feature	ImageViews	
Est. Hours	2	Actual 2
	12/03/2013	

Details & Status

Custom made avatars	Hours
Component	Hours
Component	Hours
Component	Hours

Components

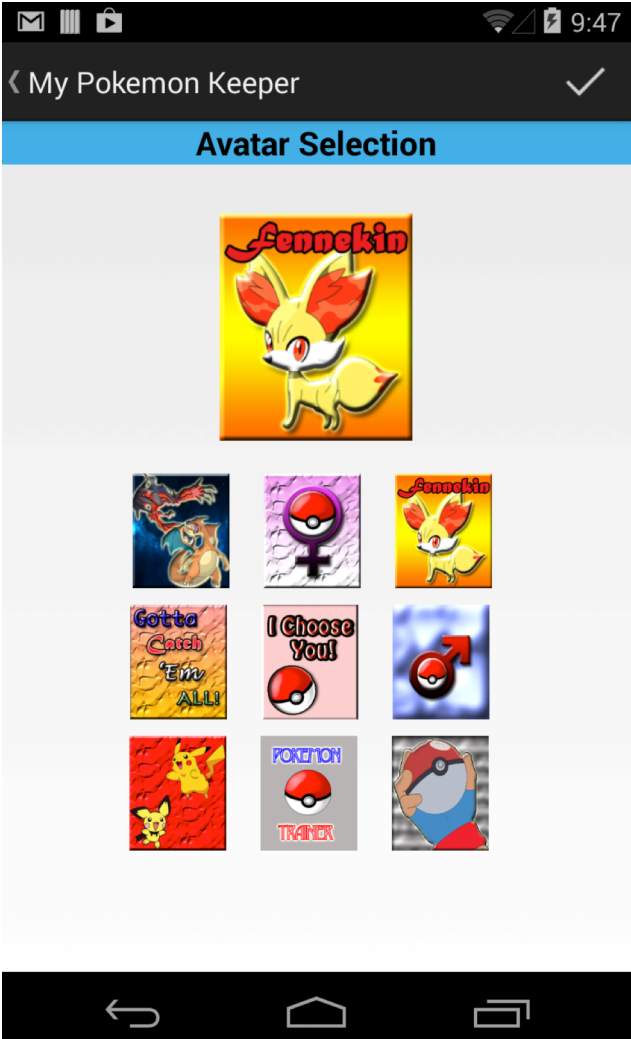

The user will be able to select from nine custom made avatars to make as their Profile Card photo. The user will also be able to see a larger image of the selected avatar before adding it to the Profile Card.

Expected Functionality

Photoshop was used to create the custom avatars. The main issue that I ran in to was making sure the images were not blurry when they were displayed in the larger image view.

Attach Photo Function	Hours
Capture Photo Function	Hours
Component	Hours
Component	Hours
Components 	

The user will be able to attach a photo from the gallery or take a new photo. The user will also have an option to select an avatar.

Expected Functionality 

The big challenge was getting the avatars to display on the "ProfilePage". The other challenge was making sure that the image the user selects stays displayed even when the user exits the application.

Changes & Outcomes

Activity	MainPage	
Feature	Action Bar	
Est. Hours	1	Actual 1
	12/02/2013	

Details & Status

ActionBar	Hours
Component	Hours
Component	Hours
Component	Hours

Components

The user will be able to view the “About” page by tapping the info icon. By tapping the plus icon, the user can navigate to the “Add New” page. The smiling icon will navigate the user to the “Profile Card” page.

Note: The “Captured Pokemon” and “Add New” pages will be created at a later milestone.

Expected Functionality

The ActionBar makes navigation easier for the using.
