Progression Summary

Activity: CapturedList

Feature: Custom ListView

Est. Hours: 19   Actual: 12

12/17/2013

Details & Status

-Custom List View (2 hours)
-Custom List View Items (2 hours)
-Custom List View Adapter (3 hours)
-List View Delete Function (2 hours)
-Display More Item Info (2 hours)
-Array Adapter (2 hours)
-SQLite Remove Function (3 hours)
-SQLite Read Function (3 hours)

Components

The user will be able to view the information of their captured Pokémon. The user will also be able to delete a Pokémon from their list.

Expected Functionality

Creating the SQLite database was the easiest part. The main problem was displaying the images, and creating the custom list view. I had an issue with getting the ID of each item, which had caused issues to the delete function. All issues were resolved.

Changes & Outcomes
